SUMMARY

Full-stack engineer with 3 years of experience building enterprise-grade web applications end-to-end — responsive React.js, HTML5, and CSS3 frontends paired with Node.js/Express backend services, RESTful API design, and MySQL/MariaDB relational database design. Experienced across the broader backend stack, including RabbitMQ messaging, Redis, and microservices-based system design, with growing ownership of architecture decisions across both frontend and backend. Track record of cross-functional collaboration, code reviews, and mentoring.

SKILLS

Frontend: React.js, Redux, REST API Integration, Responsive UI Development
Backend: Node.js, Express.js, Sequelize ORM, REST API Design, RabbitMQ (AMQP/MQTT), Redis, WebSockets, STOMP
Database: MySQL, MariaDB, SQL, Database Design
Tools and Practices: Git, GitHub, Sentry, Jest, Webpack, Agile, Ubuntu Linux
Cloud: AWS CloudWatch (Log Monitoring)
Architecture & Design: Microservices Architecture, System Design, Backend & Frontend Architecture
AI-Assisted Development: Claude Code, Claude Cowork, AI-Driven Feature Development, Technical Research & Analysis
Other: Python (Basic), API Integration

EXPERIENCE

Full Stack Developer, E2 Infosystems, Chennai **March 2023 - Present**

Project: CATMO | Technologies: React.js, Redux, Node.js, Express.js, MySQL, MariaDB, Sequelize ORM, RabbitMQ, Redis, WebSockets, STOMP, REST APIs

- Built real-time operational dashboards using WebSocket and STOMP, delivering critical safety alerts and event communications with sub-second latency across the enterprise network.
- Designed cross-protocol messaging infrastructure on RabbitMQ (AMQP and MQTT) to orchestrate multi-channel communication across distributed enterprise environments.
- Built role-based administrative reporting and mustering workflows end-to-end, including React frontend, Node/Express APIs, and MySQL/MariaDB via Sequelize, rendering dynamic operational analytics by role.
- Implemented QR-based registration and personnel safety check-in flows, improving mobile adoption and tracking accuracy for emergency-preparedness workflows.
- Monitored application logs via AWS CloudWatch to support debugging and troubleshooting in production.
- Mentored junior developers on React component patterns and frontend best practices as part of the team's code review process.
- Contributed to system design and architecture decisions for CATMO's microservices-based backend and frontend, helping shape service structure and technical approach across the platform.

PROJECTS

Formicon **6 Months**

Multi-tenant SaaS platform for forms, approvals, and task workflows (SSO-ready, SOC 2 Type II). Technologies: React.js, Python

- Built frontend features, including notification-related functionality, for a platform supporting per-tenant roles and permissions.

Certify Platform, Frontend Contributor **6 Months**

QR-secured e-certificate issuance and verification platform. Technologies: React.js, Python

- Contributed frontend bug fixes and UI refinements to improve platform stability and usability.

EDUCATION

Bachelor of Engineering (B.E.), Electronics and Communication Engineering **June 2023**

Sri Shanmugha College of Engineering and Technology, Sankari, Salem

CERTIFICATIONS

Frontend Developer (React) Certificate, HackerRank

Certifies proficiency in React, CSS, and JavaScript | Verify: hackerrank.com/certificates/5da4cc5d4158
