SUMMARY

Full Stack Engineer with **3.5+ years** building production **Node.js services and React applications** with JavaScript and TypeScript. Owns features from design to production across **event-driven microservices, asynchronous workflows and real-time systems**, with a focus on reliability and performance. Builds **LLM-powered features** and works daily with AI coding tools.

SKILLS

Languages: TypeScript, JavaScript (ES6+), SQL, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, WebSockets / STOMP, Service Integrations, Asynchronous Workflows

Frontend: React.js, Redux, Reusable Components, Responsive UI

Distributed Systems: Microservices, Event-Driven Architecture, RabbitMQ (AMQP, MQTT), Redis, Dapr Workflows

Databases: MySQL, MariaDB, Sequelize ORM, Indexing, Query Optimization

Cloud & Tools: AWS (ECS, EC2, ElastiCache, CloudWatch), Containerized Services, PM2, Sentry, Jest, Git, Agile

AI & Developer Tools: Google Gemini API, LLM Integration, Prompt Engineering, Claude Code

EXPERIENCE

Full Stack Developer | E2 Infosystems, Chennai **Mar 2023 – Present**

- Grew from intern to owning features from technical design through testing, release and production support, across React front ends, Node.js services and MySQL.
- Helped define service boundaries and RabbitMQ messaging patterns for an event-driven platform.
- Cut an alert-history API from 13.56s to 0.47s on a 3M-row test dataset with composite indexes and keyset pagination, using EXPLAIN ANALYZE and repeatable timing runs.
- Designed a health-check worker for multi-instance Node.js services: a Redis lock with expiry and renewal, compare-and-set writes and fail-closed handling, so a crashed instance recovers without manual action.
- Monitored production with AWS CloudWatch and Sentry, tracing errors to root cause and shipping fixes.
- Led code reviews and mentored junior developers on React best practices.

PROJECTS

CATMO | Enterprise Safety & Communication Platform **Full Stack Developer**

Tech: *React.js, Redux, Node.js, Express.js, MySQL, RabbitMQ, Redis, WebSockets, STOMP, Microservices*

- Built real-time WebSocket/STOMP dashboards delivering safety alerts to 500+ users in under a second.
- Designed event-driven RabbitMQ messaging bridging AMQP and MQTT, decoupling services for reliable multi-channel delivery.

Durable Incident Triage Agent | AI Workflow on Dapr **Personal Project**

Tech: *TypeScript, Node.js, Dapr Workflows, Google Gemini API, SQLite*

- Built a multi-step AI triage workflow on Dapr that resumes from its last completed step after a process crash, without repeating finished work or LLM calls.

Formicon | Multi-Tenant SaaS Workflow Platform **Frontend Developer**

Tech: *React.js, Firebase Cloud Messaging, REST APIs*

- Fixed Firebase Cloud Messaging delivery so push notifications reliably reach users.

AI Portfolio Assistant | Generative AI Chatbot **Personal Project**

Tech: *React.js, Node.js, Google Gemini API, Vercel Serverless Functions*

- Built a serverless Gemini assistant that answers questions from portfolio data with streamed replies.
- Hardened it against prompt injection and made-up answers using grounded prompts and rate limiting.

EDUCATION & CERTIFICATIONS

B.E., Electronics & Communication Engineering | Sri Shanmugha College of Engg. & Tech., Salem **2023**

Frontend Developer (React), HackerRank | React, JavaScript, CSS | Verify credential
