EXPERIENCE

Full Stack Developer | E2 Infosystems, Chennai **Mar 2023 – Present**

- Started as an intern and grew into owning features end-to-end across React, Node.js, and MySQL.
- Helped shape service structure and messaging patterns for a microservices platform.
- Mentored junior developers on React best practices and reviewed code to keep quality consistent.
- Traced production errors to root cause using AWS CloudWatch and Sentry logs, and shipped fixes.

PROJECTS

CATMO | Enterprise Safety & Communication Platform **Full Stack Developer**

Tech: *React.js, Redux, Node.js, Express.js, MySQL, RabbitMQ, Redis, WebSockets, STOMP*

- Built real-time WebSocket/STOMP dashboards delivering safety alerts to 500+ users in under a second.
- Designed RabbitMQ messaging bridging AMQP and MQTT for multi-channel, distributed communication.
- Built role-based reporting and mustering workflows with tailored analytics for each user role.
- Implemented QR-based safety check-in, improving mobile adoption and tracking accuracy.

AI Portfolio Assistant | Generative AI Chatbot **Personal Project**

Tech: *React.js, Node.js, Google Gemini API, Vercel Serverless*

- Built a Gemini-powered assistant that answers recruiter questions from portfolio data, streaming replies live.
- Guarded against prompt injection and made-up answers with grounded prompts and rate limiting.

Formicon | Multi-Tenant SaaS Workflow Platform **Frontend & Mobile Developer**

Tech: *React.js, Capacitor (Android), Firebase Cloud Messaging, REST APIs*

- Shipped the first Android APK with Capacitor, bringing push notifications and Google Sign-In to mobile.
- Fixed Firebase Cloud Messaging delivery so notifications reliably reach users on both web and Android.
- Built multi-department user assignment and form/request filters, so admins can find data faster.
