NAVEEN ELANGO

Full Stack Developer | React.js · Node.js · Real-Time Systems

Chennai, Tamil Nadu, India | naveenelango018@gmail.com | +91 6382883018

naveenelango.vercel.app | linkedin.com/in/naveen-elango-4841302a6 | github.com/navin017

SUMMARY

Full Stack Developer with **3.5+ years** of experience building enterprise web applications across the entire stack, from **React and Angular** frontends to **Node.js/Express** services and **MySQL/MariaDB** databases. Focused on **real-time systems** where speed and reliability matter, including WebSocket dashboards and RabbitMQ messaging in a microservices architecture. Detail-oriented and collaborative, with experience in design discussions, code reviews, and mentoring junior developers. Currently expanding into **Generative AI**, building LLM-powered features with the Google Gemini API.

SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3, SQL, Python (Basic)

Frontend: React.js, Angular, Redux, Responsive UI Development, REST API Integration

Backend: Node.js, Express.js, Sequelize ORM, REST API Design, WebSockets, STOMP, RabbitMQ (AMQP, MQTT), Redis

Databases: MySQL, MariaDB, Relational Database Design

Architecture: Microservices, Event-Driven Architecture, Pub/Sub Messaging, Real-Time Systems, Component-Based Architecture, Role-Based Access Control (RBAC)

Tools & Cloud: Git, GitHub, Jest, Webpack, Sentry, AWS CloudWatch (Log Analysis & Monitoring), Ubuntu Linux, Agile

Generative AI: Google Gemini API, LLM Integration, Prompt Engineering, Streaming Responses, Claude Code

EXPERIENCE

Full Stack Developer | E2 Infosystems, Chennai **Mar 2023 – Present**

- Develop and maintain enterprise web applications end-to-end, owning features across React/Redux frontends, Node.js/Express REST APIs, and MySQL/MariaDB data layers.
- Contribute to system design and architecture decisions for microservices-based platforms, helping shape service structure, messaging patterns, and frontend architecture.
- Mentor junior developers on React component patterns and best practices, and review peer code.
- Analyze production logs in AWS CloudWatch and Sentry to trace errors, find root causes, and resolve issues.
- Work with cross-functional teams in Agile sprints to take features from requirements through to production releases.

PROJECTS

CATMO | Enterprise Safety & Communication Platform **Full Stack Developer**

Tech: *React.js, Redux, Node.js, Express.js, MySQL, MariaDB, Sequelize ORM, RabbitMQ, Redis, WebSockets, STOMP*

- Built real-time operational dashboards using WebSocket and STOMP, delivering critical safety alerts and event communications with sub-second latency across the enterprise network.
- Designed cross-protocol messaging infrastructure on RabbitMQ (AMQP and MQTT) to coordinate multi-channel communication across distributed enterprise environments.
- Built role-based reporting and mustering workflows end-to-end (React UI, Express APIs, Sequelize data models), rendering dynamic operational analytics for each user role.
- Implemented QR-based registration and personnel safety check-in flows, improving mobile adoption and tracking accuracy for emergency-preparedness workflows.

AI Portfolio Assistant | Generative AI Chatbot **Personal Project**

Tech: *React.js, Node.js, Google Gemini API, Server-Sent Events, Vercel Serverless*

- Built a portfolio AI assistant that streams Gemini responses token-by-token into a React chat UI, grounded in structured profile data through prompt engineering, with guardrails, input limits, and rate limiting.

Formicon | Multi-Tenant SaaS Workflow Platform **Frontend Developer**

Tech: *React.js, Python*

- Built frontend features, including notification functionality, for a multi-tenant SaaS platform for forms, approvals, and task workflows with per-tenant roles and permissions (SSO-ready, SOC 2 Type II).

Certify | QR-Secured E-Certificate Platform **Frontend Contributor**

Tech: *React.js, TypeScript, Python*

- Delivered frontend bug fixes and UI refinements for a QR-secured e-certificate issuance and verification platform, improving stability and usability.

EDUCATION & CERTIFICATIONS

B.E., Electronics and Communication Engineering | Sri Shanmugha College of Engineering and Technology, Salem **2023**

Frontend Developer (React), HackerRank | React, JavaScript, CSS | Verify credential
